

Bio-Organic, High Nutrients, High Quality Agilix Animal Probiotics

Agilix Animal Probiotics for Pig

Agilix Animal Probiotics for Pig contains healthy bio-organisms that will improve an animal's growth coupled with many other health benefits, including increasing their resistance to diseases. Our product is environmentally friendly, using it minimizes pollution impacts on your environment, reducing harmful discharge such as phosphate, nitrogen and ammonia.

Build a healthy livestock and increase production

Agilix Animal Probiotics for Pig is a type of probiotics for pigs that improves health conditions and builds resistance against diseases while minimizing pollution in your environment.

Probiotics are micro-organisms, which builds protective barriers around each cell and support healthy intestinal flora in livestock. These cell barriers can survive a variety of adverse digestive conditions e.g. wide PH range.

Agilix Animal Probiotics for Pig comes in 3 different varieties catering for different needs of a livestock farmer - for Piglets, making them healthier and more disease-resistance, for Fattening Pig, making pigs fatter, and improving their appearance, and for Sows, making them more productive.

The growth and overall health being of livestock has become increasingly critical to farms to ensure that the farm meets the market demands. Agilix Animal Probiotics for Pig promotes growth by building resistance of these pigs against anti-nutritional factors, and the enhanced mix helps to fatten pigs and improve the reproduction rate of sows.

Agilix Animal Probiotics for Pig

i. Agilix PIGLET PROBIOTICS

Agilix Piglet Probiotics contains a massive amount of probiotics that keeps the piglet's intestinal tract balanced with healthy micro-organisms, which will help to restrain the nocuous organism's growth, prevents diarrhea of weaning piglets and improves piglet's resistance against diseases.

ii. Agilix PIG FATTENING PROBIOTICS

Agilix Pig Fattening Organic Feed significantly improves the appearance of fattening pigs to highlight the species' characteristics, and promote digestion and absorption of nutrients in feed. Probiotics increase daily gain and decreases feed conversion ratio, which means you feed lesser and your pigs grow bigger.

iii. Agilix SPECIAL PROBIOTICS FOR SOWS

Agilix Special Probiotics for Sows significantly improves the appearance of the sows' characteristics, improves feed effectiveness, and promote digestion and absorption of nutrients in feed, while enhancing the immune system and build sow's resistance against diseases.

Recommended Applications:

- When using Agilix Pig Probiotics, add it into the feed and mix well for best results. Recommended dosage between 1kg to 1 tonne used, or adjust dosage according to prescribed feed.
- Store in a cool (room temperature), dry place and away from direct sunlight. By adequate storage, a retained activity of more than 90% is guaranteed up to 2 years after the date of production.

AVA Test

Agilix Piglets Probiotics

AVA Report V-021-2015-10-01853
Chloramphenicol, ppb -- Not detected
Crude protein, % -- 17.0
(Nitrogen x 6.25)

Agilix Pig Fattening Probiotics

AVA Report V-021-2015-10-01855
Chloramphenicol, ppb -- Not detected
Crude protein, % -- 14.6
(Nitrogen x 6.25)

Agilix Special Probiotics for Sows

AVA Report V-021-2015-10-01854
Chloramphenicol, ppb -- Not detected
Crude protein, % -- 14.5
(Nitrogen x 6.25)
